

MUHAMMAD SAZZAD HOSSAIN

Full-Stack Software Engineer

+880 1348-060558 | sazzadfahimse@gmail.com | Rampura, Dhaka-1219, Bangladesh

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack software engineer with 3+ years building enterprise SaaS products across **.NET (C#, ASP.NET Core, Angular)** and **MERN (MongoDB, Express, React, Node.js)** stacks, with hands-on Azure cloud and CI/CD experience. I ship features end-to-end, from data models and REST APIs to polished, permission-aware React UIs.

PROFESSIONAL EXPERIENCE

ImpleVista BD Limited — Software Engineer

Dhaka, Bangladesh | 2023 – Present

Project: IV Trip — Multi-Tenant Travel Management Platform (React, TypeScript, Redux Toolkit/RTK Query, Tailwind CSS, Vite, Node.js, Express, MongoDB)

- Engineered a **dynamic role-based access control (RBAC) system** in which sidebar navigation and route access are generated at login by cross-referencing MongoDB role permissions against a master menu registry — enabling per-tenant, per-role UI composition without redeployment.
- Built a **Kanban-style task board** for visa booking operations, including task assignment, status tracking, and permission-gated visibility.
- Maintain a **dual-backend architecture** (admin and customer-facing services) with shared tenant-aware database connections, JWT authentication, and API rate limiting.

Project: IVHR — Construction HR & Project Management System (React, Node.js, Express, MongoDB/Mongoose, Tailwind CSS, Azure)

- Built a **Document Management System (DMS) with OCR-powered full-text search**: automatic text extraction from PDFs, images, and Word files (tesseract.js, pdf-parse, mammoth) runs asynchronously on upload, making every document searchable by any keyword.
- Integrated **Azure Blob Storage** for all file handling — project documents, task attachments, and direct DMS uploads — with a unified mirroring pipeline so files from every source appear in one searchable library.
- Designed the **project-management data layer** (projects, tasks, tickets, todos, clients) with Mongoose, including dashboard aggregation endpoints and a **DevOps-style Kanban task board** featuring drag-and-drop ordering, progress bars, and blocked/overdue indicators.
- Own deployment and reliability on Azure: configured **Azure Pipelines CI/CD with Docker**, resolved Linux/Windows case-sensitivity build failures, and diagnosed production issues using App Service log streams and Application Insights.
- Hardened authentication with **JWT middleware, login rate limiting**, and tenant-scoped database connections.

Project: AvantCare — Offshore Developer (contracted to Illuminance Solutions, Perth, Australia) (Dynamics 365, .NET, Azure Functions, Angular, React, Power Platform)

2024 – Feb 2026

- Developed Azure Functions and Dynamics 365 plugins in .NET for a care-management solution, and built web resources with Angular, React, and Power Apps.
- Automated business processes with Power Automate and integrated cloud services with Dynamics 365 for scalability and security; tracked work in Azure DevOps under Scrum/Kanban sprints.

Project: CUBIS — Co-operative Credit Union League of Bangladesh (ASP.NET Core, Angular, SQL Server)

- Develop features across the ASP.NET Core backend and Angular frontend of a fintech platform; participate in code reviews and refactor for maintainability and regulatory compliance.

TECHNICAL SKILLS

Languages	C#, JavaScript, TypeScript
Frontend	React, Angular, Redux Toolkit & RTK Query, Tailwind CSS, Vite, Power Apps
Backend	ASP.NET Core, Node.js, Express, Mongoose, Azure Functions, Dynamics 365 Plugins
Databases	MongoDB (multi-tenant design, aggregation), SQL Server, MySQL
Cloud & DevOps	Azure App Service, Blob Storage, Pipelines (CI/CD), Service Bus, Application Insights, Azure DevOps, Docker, Git
APIs & Integration	RESTful APIs, GraphQL, OData, JWT Authentication, OCR pipelines, Power Automate
Practices	Agile (Scrum & Kanban), Code Reviews, Multi-tenant SaaS Architecture, RBAC

CERTIFICATIONS

Microsoft Certified: Power Platform Developer Associate (PL-400) • Microsoft Certified: Power Platform Fundamentals (PL-900)

PUBLICATION

“A CNN-Based Strategy to Classify MRI-Based Brain Tumors Using Deep Convolutional Network” — *Applied Sciences*, 2023, 13(1), 312.

EDUCATION

East West University — B.Sc. in Computer Science and Engineering (Graduated January 2022)
